

Sathvik Jasti

(470) 871-5249 | sathvikjasti27@gmail.com | New York, NY

Professional Experience

- | | |
|--|---------------------|
| Software Developer Orbit Analytics, New York, NY | May 2024 - Present |
| • Engineered REST APIs using Java Spring Boot that integrated Hugging Face LLMs to enable AI driven data summarization and natural language query processing, reducing average API response time by 30% and improving user query accuracy. | |
| • Developed data processing scripts in python to automate data extraction and transformation, reducing manual effort by 30% and improving data accuracy for stakeholder reporting. | |
| • Collaborated with UI/UX designers to refine React components, ensuring adherence to accessibility standards and improving usability scores. | |
| • Deployed machine learning models on AWS Sagemaker using PyTorch, streamlining the model training process and reducing deployment time by 50%. | |
| • Implemented Docker containers for model deployment, ensuring consistent environments across development and production, which improved deployment reliability and reduced rollback incidents by 70%. | |
| Research Assistant Florida Institute of Technology, Melbourne, FL | Aug 2023 - May 2024 |
| • Developed innovative full stack applications with React.js and Node.js, incorporating AI features via RAG + LLMs to make NASA standards interactive and queryable, boosting research productivity by 25%. | |
| • Maintained software through unit testing, debugging, and documentation, troubleshooting access issues to ensure seamless integration with Google Cloud SQL. | |
| • Participated in SDLC phases from analysis to support, collaborating with teams using Agile methodologies and Git for source control. | |
| • Streamlined deployment pipelines by containerizing services with Docker and automating on Google Cloud Run, while documenting architectural decisions for knowledge sharing. | |

Projects

- | | |
|---|--|
| Freelance: Solar Data Automation Project Infinite Photon Energy, Texas, USA | |
| • Saved 10 hours of weekly manual effort by automating data pipeline from ERCOT and Photon APIs to Google Sheets. | |
| • Improved data reliability by 30% with dual ETL workflows and deduplication logic. | |
| • Increased forecasting accuracy by 25% through automated revenue calculations and daily completeness tracking. | |
| Freelance: Full Stack Developer Estilo Latino Dance Studio, New Jersey, USA | |
| • Developed and deployed a full stack web application for a dance studio business using React, TypeScript, Node.js/Express, and Supabase (PostgreSQL) on cloud infrastructure | |
| • Designed and optimized complex SQL queries for customer management, pass tracking, check in history, expiration alerts, and automated birthday/notification scheduling using PostgreSQL with Supabase | |
| • Integrated third party APIs including Square for secure payment processing, Twilio for SMS notifications, and Resend for automated email delivery with role based admin/staff dashboards | |

Technical Skills

Languages & Frameworks: Node.js, React.js, Java, Python, JavaScript, TypeScript

Databases: PostgreSQL, MySQL, MongoDB, Redis, Redshift

Cloud & DevOps: AWS (EC2, S3, Lambda), GCP (Cloud Run, Cloud SQL, Pub/Sub), Docker, Terraform, Git

Practices: Agile/Scrum, SDLC, RAG & LLMs, Code Reviews, Pull Requests

Education

- | | |
|---|---------------------|
| Master of Computer Information Systems
Florida Institute of Technology, Melbourne, FL | Aug 2023 - May 2025 |
| Bachelor of Technology in Artificial Intelligence
Vidya Jyothi Institute of Technology, India | Aug 2019 - Apr 2023 |
